## Clareholm Local News

S. Pedersen was a patient in hospital this week.

Jack Stokes of Stavely is a patient in the hospital here since the 29th.

Mrs. Geo. Todd was able to return home from the hospital on Monday.

Dr. and Mrs. Ganeey are leaving this week for their new location in the north.

Jas. McKinney is in the east, having been called to Ottawa by the death of his brother.

Easter tea will be held in the Parish Hall on April 16, by the ladies of St. John's Guild.

Miss Celia Anderson, of Parkland, was visiting with Mrs. W. C. Miller during the week.

H. A. Glenn, Ford representative, has been quite ill at the hotel for a few days, with a cold.

Mrs. Hilbert Hafner of Stavely, who has been a patient in the local hospital, returned home on Monday.

I. F. Reynolds, of Eugene, Oregon, was in town several days the past week, looking after his interests here.

On Friday last S. L. Fraser returned through the sale of W. T. Neville farm adjoining Parkland, to Jess Winge of Stavely.

A movement is well under way to organize a firebrake lodge here this year, in connection with the local lodge, No. 13, I. O. O. F.

Jack McDonald who was killed by a motor truck in Calgary last Thursday, was a brother of R. S. McDonald of the Clareholm Garage.

Mrs. Mary Maxwell, who died last week at Columbia Falls, Montana, was well known here, having been a former resident of Clareholm.

March gave us a wintry farewell. There was a cold wind from the north on Thursday, with a light snowfall, and April came in raw and chilly.

L. A. Starck, editor of the Calgary Sun, was a fraternal caller at the Review office the first of the week, having motored over. Mrs. Starck accompanied him.

Zane Grey's "Forlorn River," with Jack Holt, Raymond Hatton, Arlette Marchal and Edmund Burns, at the Rex theatre Friday and Saturday nights this week.

One day this week Mr. Harrigan lost his pocketbook containing a considerable sum of money. It was found by Joe Bonquist and returned to Mr. Harrigan.

Mrs. Thos. Moore and daughter Miss Grace, entertained seven tables of bridge last Saturday night. Miss Kate McDonald won high. Mrs. Dickmeier second, and Mrs. Mullin low.

Rev. Olive Bean was in Calgary last week attending the annual meeting of the Assembly of the Nazarene. Others from here in attendance were: P. A. Harding, W. S. Day, and Mrs. R. S. Laing.

John F. Miller, eye sight specialist, of 404 Underwood Block, Calgary, will be at Queen's Hotel in Clareholm on Monday, April 4th, for the purpose of correcting you and your children's eyes. Do not miss this opportunity.

On Wednesday, April 6th, the St. John's Ladies Guild will meet in the Parish Hall at 3 o'clock, when Mrs. Moore will speak on her visit to Calgary for the consecration of the Bishop; also the social business of the Guild will be carried on. All members are requested to attend.

An auction sale of farm implements (including two tractors), four good farm horses, four light horses, a team of mules, and one first class milk cow, will be held at Dr. McMillan's farm (recently sold, 7 miles east of Clareholm on Staphine road and one mile south, on Saturday afternoon, April 2nd, starting at 2 o'clock. For full particulars see sale bills. A. E. Rumsen, Auctioneer.

Subscriptions to the skating club total over \$5,000.00 at last reports. A meeting of those who have subscribed will be held next Tuesday for the purpose of organization, selection of site, etc.

There was a large attendance at the Old Fellows' social evening on Monday last. Carpet-dance and other games made the evening pass all too quickly. There was also a short program of recitations, solos and community songs. The evening closed with a fine lunch.

The young people of the Y. & L.T.L. are planning to hold a companion oratorical model contests in the near future. The novel feature of these contests is that the program of one is to be given entirely by boys, and the other by girls. The first will be put on immediately after Easter. Watch for further announcement next week.

"The Homeless Eight," of the C.S.A. staff, entertained at bridge at the college on Tuesday night. J. W. McPhee won men's high, and Mrs. Dickmeier ladies' high. Special average prize for ladies was won by Miss McWilliams, and the gentlemen's by F. O. Foster. Lunch was served after bridge, and this was followed by dancing. It was a highly enjoyable affair.

### J. J. VANCE ACQUITTED IN AUTO ACCIDENT CASE

The case against J. J. Vance, charged with knocking down and running over J. H. Bonquist and not stopping or returning to the scene of the accident, came up before Magistrate Steadman of Meeked, on Tuesday.

David McKee was the only witness to the accident who was positive that Vance was the driver of the car.

Other witnesses saw the accident, but could not identify the driver.

Vance testified that he and Mrs. Vance were in town the day of the accident and went home together in the car, at an earlier hour than that ascribed to the accident; did not go by way of the street on which the accident took place, and did not pass the town hall corner on their way home.

Mrs. Vance's testimony agreed with her husband's in all particulars.

Vance was acquitted.

### CLARESHOLM FARMERS BUY BLUE BLOOD STOCK

On Monday last J. H. Davison and T. R. Evans motored up to Okotoks to take in Laycock & Mackie's dispersion sale of pure bred Holsteins, and were the means of bringing to Clareholm the outstanding cow of the sale, J. H. Davison purchasing Bonnie Brae Lady Johanna with a record of 18,000 lbs. of milk and a test of 4 per cent butterfat. He also purchased a good quality heifer, Bonnie Brae Jessie Perfection.

T. R. Evans purchased the heifer calf Bonnie Brae Belvedere Cytheria, out of the noted cow Belvedere Cytheria DeKol, Imp.

### JACK McDONALD KILLED IN AUTO ACCIDENT

Calgary Herald, March 25—Darting out from the sidewalk, where he had been throwing snowballs with some comrades, Jack McDonald, seven years, son of Mr. and Mrs. Alex. McDonald, 2205 Fifth street west, was struck by a motor truck in charge of Alex. Houston, 1817 Twenty-third avenue west, and died in the Holy Cross hospital about seven hours later.

Houston, swerved the truck to avoid the lad but he was too close to him at the time and the end of the car struck the boy on the head knocking him to the pavement. The accident occurred about 3:20 o'clock Thursday afternoon, on between Twenty-third and Twenty-fourth avenue west.

## Prairie Provinces

Western Provinces Basking the World in Rapidity of Growth

When a Canadian historian said, in effect, that the Prairie Provinces "beat the world" in rapidity of growth, some of us may have felt that patriotism unbecomingly affected his mathematics. The figures, just published of the Saskatchewan census, taken last June, bear him out. If the population of 321,000 is still comparatively scanty, the increase of 62,500 in four years is notable, and a still more notable its increase in twenty-five years. In 1901, its first appearance in the census returns, the Province had only a little more than 21,000 inhabitants.

And the everlastingly bewailed flux of many-folk to the cities, obscures the peculiarity of Saskatchewan. Her growth, says The Montreal Gazette, "is mainly in the rural population, which is about double that classified as urban."

This is a characteristic of the Prairie Provinces, differentiating them from the rest of the Dominion, the United States and the world in general. In population Saskatchewan is now next, if by a long interval, to Quebec and Ontario. "When the results in Manitoba and Alberta are announced, the Prairie provinces will be first in population in the Dominion. The Canadian West is expected to repeat the history of its American prototype—New York Times.

## "Home" Most Cherished Word

French have Recently Included it in Their Dictionary

To the exile "Home" is the only word that moves the heart and brings immediately to mind memories he would never willingly let die. To the child it is sanctuary; to the youth it is home ought to be a place of refuge, relief to which he can always turn in certainty of understanding and sympathy; to the grown-up folk it is the place to which their thoughts fly at all moments of joy or of sorrow, of rejoicing or of mourning. To the old folk it is the one corner of earth where they can watch with fondness the approach of the sunset, steadfast and serene, of life's little day. The French have, accordingly, perhaps, included in their dictionary the word of all words most cherished wherever the English language is spoken. —Montreal Star.

## A Young Financier

New Jersey Laid Berows Funds From Bank to Build Dog's House

One Stuart, 12, of Orange, New Jersey, had \$2.25 in his savings bank and wanted two dollars more to build a house for "the best dog in the house," which his parents would not allow him to keep in the house. He consulted Walter Van Riper, president of a local bank. "I want to borrow two dollars from the bank, will sign a note and pay six per cent interest," said the boy. "But how about the security?" "Well, I'm going to get a job, working after school, and I can pay it back all right." Mr. Van Riper directed the cashier to make out a three months note for \$2.25 per cent.

"Security is initiative, confidence and personality," the bank president added.

## Smallest Fish in the World

In the Philippines the people of Luzon eat the smallest fish in the world. This is the goby, which is found in countless millions in Lake Dalu, and by the side of which the whitefish would appear like a salmon. The goby, known to the Luzon natives as *tabas* or *shogabas*, are about half an inch long, but they are as keen as sea hares. They are fried and pressed into cakes, so that a hearty Luzon workman will actually eat thousands of them at a meal.

## Letter Held as Read

Referring to the calligraphy of Sir James Harris. Some years ago I attended a dinner of London Society. "The hon. secretary has received a letter from Sir James Harris," announced the chairman, "and I now call upon him to read it." (Cheers.) "I read the hon. secretary," "Read it," "He got that letter which he never then stopped, unable to make out another word."

It was agreed to hold the letter as read.

A diving bell which walks on the bottom of the sea by means of four legs, has been designed by a western engineer.

A ripple of laughter is worth a flood of tears at any stage of the game.

W. N. C. 1671

## Has Ended Long Vigil

Wooden "Habitant" on Watch in Montreal for 84 Years Bought by American

"Donhomme," the quaint old wooden carved French-Canadian "habitant" with his traditional top, hood and moccasins, who for 84 years gazed sentinels upon St. Paul street, near Montreal's water front, will not "see" or be seen in that city any more. He has been sold to J. A. Sparhawk, Boston, N.S., collector. The wooden "habitant" was carved by M. John, known in the '50s as a wood-carver, of Debonville, who established a tobacco store at 123 St. Paul street east in 1810. "Donhomme" was installed on a pedestal outside the tobaccoist's shop. There he stood for 84 years, with the exception of one night, weathering Canada's varied temperatures. Later, Debonville sold his store, "Donhomme" was included in the bargain. This transaction was repeated many times and the little old place has always part of the sale.

For many years "Donhomme" continued to attract a singular and wondrous and won popularity among visitors to Montreal, until he was seen by Mr. Sparhawk. The collector wanted the "habitant" and after much persuasion succeeded in purchasing him from his former owner, the present proprietor of 123 St. Paul street. Two rusted hinges driven deep into the weathered stone front of the 18th century French style building, are now the only survivors for Montrealers of the carved "habitant."

"Donhomme's" night of ease about in a time when the joints of the English created under the strain of magnificent victories between McGill and Laval universities. The latter is Montreal's French college. It was on the night of the 10th of October, 1900, that "Donhomme" disappeared. He was found the next day in the snow on Victoria bridge. Victoria bridge is about the mile from 123 St. Paul street. He was replaced on his pedestal and remained there until the night of the 10th of October, 1900, when Mr. Sparhawk, Mr. John, the originator of "Donhomme," is now a centenarian and lives near Quebec City.

## Locomotive Whistle Cootly

U.S. Railway's Seem About Eight Miles Every Year

At least \$5,000,000 is spent yearly by the railways of the United States in the purchase of new locomotives, according to estimates. Each hour of continuous use of any whistle consumes about four tons of water and 120 pounds of coal, says Popular Mechanics Magazine. Suggestions have been made that the whistle be moved ahead of the locomotive, so that its sound would be deflected much less, and that it be constructed to give a lighted beam which would have a longer range of utility.

## Is North Americans Sinking?

Will Take Long Time for Geologists to Find Answer

Geologists have long expected that the continent of North America is slowly sinking, or perhaps it is more accurate to say that it is tilting downward toward the west. The National Research Council means to find out what truth there is in this theory, and it is accordingly setting a number of tide gauges at various points to determine whether or not the shore line is changing. It will take a long time to find the answer, for no one supposes that the change, if any, amounts to more than a foot or two in a century.

## Word With Two Meanings

The final item in the sheet which the professor of natural history designed for the boys' club reads thus: "Disposition of animal at end of feeding period." One boy reported "Very quiet and tame, but barks at times," and another boy said "Very violent." Next time the professor will simply ask what was done with the animal at the end of the feeding period, and will get the information he wants.

## The Elbow of Life

You all know about the Big Boy, at Rochester, Minnesota. Well, they say this story about an elbow of life is bunk; that the only way to live long and be comfortable and healthy is to take care of yourself. Everyone knows it, but it will do no harm for the Big Boy to repeat it.—R. W. Howe's Monthly.

First Trump—"There cars be aw-bright, they be."

Second Trump—"Oh, I dunno. One of 'em give me a lift to do next town 'foreday."

Mr. Trump—"Carah! But it must have been going fast when it hit 'em."

## Newspapers Indispensable

If Suspended Chas Would Result Says New York Man

A day without a newspaper would be an inconvenience, and a week without a newspaper would be a catastrophe, Fred A. Walker, chairman of the Publishers' Association of New York City, told the Broadway Association at its luncheon. Whatever happens, the public looks first to the newspapers for information, and this is the greatest tribute that can be paid to the truthfulness and accuracy of the daily press, he said.

If the newspapers are suspended, the cars and the mouth of the world. They perform the functions of seeing, hearing and telling for twenty-four hours of every day in the year. Upon the publicity afforded by the newspapers depends the prosperity of a thousand different forms of society and the return on millions of dollars invested. Indispensable chaos would result if the newspapers were suspended.

## Want New Name for Town

But Citizens of Boney, England, Are Not Unanimous

A campaign has been started by some citizens of Boney to alter the name of their town. They, however, who are opposed to changing the name of the town point out that under former name the designation had no connection with John Barleycorn, but is an old English word, which means "barley." It has been made to present the matter formally to the local governing body, but each has been unsuccessful.

Opponents of the change to another name point to letters written bearing similar names. The town of Beer in the West country did not derive its name from the beverage, but is an old form of "beer" meaning water, they contend. Hence "Boney" means the man whose word is full of water.

## Ontario First of Airplanes

Hon. W. Finlayson, Ontario Minister of Lands and Forests, announced that in the near future Ontario's first airplane for military or commercial use would be purchased. Government aircraft, the Minister stated, are to be standardized with a view to obtaining the maximum speed and fire-fighting efficiency.

Rate Manager: "Late again! Have you ever done anything on time?" His Clerk: "I bought a car."

Sliding on 50 miles an hour, the skiers being drawn by motorcycles, is popular at some Canadian resorts.

## Boys Have Been Misunderstood

Members of Scout Association Prove They Accept Responsibility

Boys have the reputation of being careless. There is more than a suspicion at times that their elders accept this condition as inevitable, and pay little attention to the possibility of developing a growing sense of duty. It has remained for the Boy Scout organizations to show that the boys are not a single forest fire waiting for a report presented at the annual meeting of the Ontario Council of the Boy Scouts' Association, held in Hamilton, more than 7,000 boys from this province spent periods ranging from one week upward, in 218 summer camps during last year. This is the record of one province alone. It was duplicated to some extent in every other province of the Dominion. Yet with this army of boys in camp not one single accident marred the record of the Scouts through the year, and furthermore not a single forest fire was occasioned by carelessness at Scout camps. This is a record of the boys' sense of responsibility which puts many a grown man to the blush.

## Canada As a Producer

Has Attained Lasting Fame as Best Wheat Grower

John McCormack, no mean authority, says the finest tenor singer in the world is a Canadian. Many of the finest products in the world are being produced in Canada. Although our population is small, Canadian swimmers, skaters and runners (two of the latter being women) have gained fame in the United States. But fame of that kind is ephemeral. Canada has produced the finest wheat in the world and presently will be producing sufficient wheat to sustain and fatten the people of the greater part of the world. That is something of real and permanent importance.—Victoria Colonist.

## Accurate Information

Passenger, to negro porter, while on train for New York—"What time do you get to New York, George?" Porter—"We is due to get there 7:15, unless you has set your watch by Enigma time, which would make it 2:15. That of course, if you is going by daylight save's time, it would be 2:15, unless you is an hour and fifty minutes late—which we is."

Snake, (sneakingly): "Give me 22 double 2's."

Central—"2222?"

"Yeh, hurry up. I'll play train with you afterward."

## Too Deadly to Be Used

Turpin, Invented by French Chemist, Laid Carries Inevitable Death

M. Eugene Turpin, the great French chemist, who died recently at the age of 78, will remain famous as the inventor of two explosives, Melinite, known as lyddite, used especially for long-range shells; turpinite, an explosive so deadly it cannot be used.

Turpinite carries inevitable death. A single bomb is sufficient to kill every man in a terrace, or hundreds in a wide area, and by its use a whole regiment could be wiped out as it perished.

But during the war the French dared not use it; it was too great a menace to the soldiers who would have to fire the guns, to civilians far from the battlefields. Friends would suffer as much as enemies.

Melinite was invented by M. Turpin in the last century, but its suggestion that it could be used in "self-propelled shells" was rejected by the French government committee as impracticable.

So he sold it to England, where it became known as lyddite, a name derived from the British town of Lydd, where it was tried out.

Immediately he was put on trial, at the instance of that office. Although acquitted of selling his inventions "over the heads" of the officials, he was sentenced to five years' imprisonment in 1889 for a breach of the official Secrecy Act.

In 1892 he was pardoned and 1914 found the French using his shells with melinite and urticur M. Turpin to further research.

The deadly turpinite was a twin.

## Standardize Binder Twine

Total Number of Feet Contained in Ball to Be Regulated

The Government is considering raising the standard of binder twine under the Sales and Inspection Act according to an answer made in the House of Commons by the Minister of Agriculture. "Because of the variability of the percentage of moisture and in consequence of the length per pound of binder twine, it would seem desirable to change the standard from the number of feet per pound to the total number of feet contained in the ball, and to establish a minimum standard of breaking strength for binder twine," the minister said.

The first savings bank was founded in 1819 in Rutwell Village, Scotland, by the Rev. John Dunlop.

The only animal immune to the bite of the cobra is the mongoose.

## Mystery Solved By Airplane

Headwaters of Great Northern River Are Determined

The myth as to the headwaters of the Thelon river, one of the great rivers of Canada, has been solved by a topographical surveyor during the summer of 1926, according to the report of the Topographical Survey Committee, presented by R. W. Cantley, D.I.S., at the annual convention of Dominion Land Surveyors.

School geographers and even the best of government maps have shown this stream as heading a relatively short distance north-east of Lake Athabasca. Last summer, G. H. Blinnet, D.I.S., made an exploratory trip into the country northeast of the Athabasca, selecting for the first part of his journey a traditional Indian route from Taim Lake to the headwaters of the Thelon River. A river known to the natives as "Sila of an Animal" was ascertained to a plateau 1,500 feet above the level of the lake. From there another river was discovered flowing northeast along Hearne's route into the country northeast of the Thelon. This river (supposed to be the Thelon) is believed after flowing one hundred miles in the desired direction, turned south-easterly into the Thelon, and joined the Athabasca at Whistler Lake. Thus the exploration removes the mystery of the Thelon headwaters, which has persisted for 150 years, since Hearne's time.

Mr. Cantley referred to the "practically unexplored" portion of Canada as the larger part of this country. "The need of more reliable maps in connection with the development of the wealth of mine and forest in this great hinterland—development which is intensifying and, in some cases, making impossible, for the vast of them. Discovery of great gold and copper deposits in the Yukon, the Klondike, the Yukon (1902), Porcupine, Kirkland Lake (1911), Wren (1922), and Red Lake (1925), roiled on and followed railroad construction.

## Enjoys the Simple Life

Prince of Wales Disappears as Much as Possible With Ceremony

The Prince of Wales, according to "Pleading Sheep," is as good as a lost private parties as he has proved to be a guest at so many official functions. There is little or no ceremony at his quiet bachelor parties at St. James Palace. He has favorite dishes and takes these opportunities to enjoy them, for at the moment simple food is rarely to be found. But he insists on being able to give dinner parties at short notice, and more than once the cook at the palace has had barely an hour's warning of the coming of a dozen guests to dine with the Prince.

The Prince's guests sit on white and gold cane chairs around a long table. The crockery is no different from that used in ordinary middle class households. A few flowers grace the board in silver bowls and vases, and the table is all the decoration that is employed.

"One has to spend most of one's time attending public dinners and banquets to know the true state of simplicity," remarks "Pleading Sheep."

"The Prince is human enough to refuse the contrast between his official duties and his private pleasures."

## Future Flare Up

Perfection of certain processes for the carbonization of coal may be expected to provide substitutes for oil and gas in the future. Such is the contention of an investigation made by the Bureau of Mines into various European processes for the low temperature carbonization of coal.

The commercial success of low temperature carbonization of coal, it was found, must depend mainly on the sale at an adequate price of the solid product—smokeless fuel—rather than on the liquid and gaseous by-products which are obtained in its manufacture. Various processes being developed in Germany and France have been studied.—Financial Review Magazine of Business.

## See Culture on Prisons

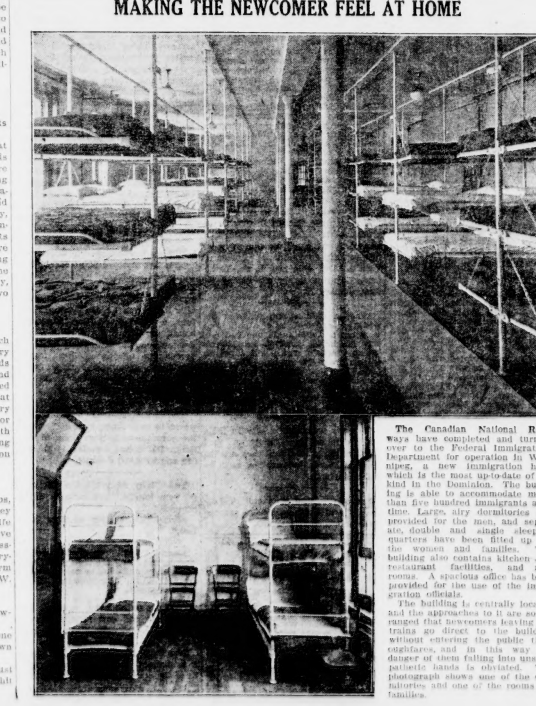

Considerable progress has been made in bee culture in the western provinces during recent years. One beekeeper in Alberta produced more honey during 1925 than was produced by the entire province in 1921.

In Manitoba the bee industry has grown in three years, and in Saskatchewan the reported crop of 1924 was over thirty times as large as that of 1915.

Mr. Wright—"So your husband has a valet, hound and coach. How nice!"

Mr. Brown—"Yes, I'm them."

"Undoubtedly personal liberty is a good thing, but I don't like to ride with a driver who is full of it."

MAKING THE NEWCOMER FEEL AT HOME

## The Canadian National Railways

Plans have been completed and turned over to the Federal Immigration Department for operation in Winnipeg, a new immigration hall, which is the most up-to-date of its kind in the Dominion. The building is able to accommodate more than five hundred immigrants at a time. Large, airy dormitories are provided for the men, and separate, double and single sleeping quarters have been fitted up for the women and families. The building also contains a bath and restaurant facilities, and rest rooms for waiting immigrants. It is provided for the use of the immigration officials.

The building is centrally located and the approaches to it are so arranged that immigrants leaving the trains go direct to the building through the public hall, baggage and in this way the danger of them falling into unscrupulous hands is obviated. The photograph shows one of the dormitories and one of the rooms for families.

### Britain is Becoming an Air Faring Nation

Price of Light Airplanes Has Been Materially Reduced

Lord Trenchard, Air Minister in the Labor Government, recently declared that in order to make Britain more famous in air-faring nations, the Government has decided to reduce the price of light aircraft. The price of a light aircraft has been reduced from £250 to £150, and the price of a motor car has been reduced from £1,000 to £750.

Now, when the news that the Avro Avian, a machine very similar in main characteristics to the Moth, has been reduced to £150. Moreover, service stations for the repair, overhaul and general maintenance of Avians have been opened at Manchester and Southampton. Other such stations will be opened where necessary in different parts of the country. People are asking why it is that the cheapest aeroplanes cost around £700, when a fully-equipped sound car can be bought for £150. There are two reasons why the price is high. The first is that the price of the car is reduced when the price of the plane is reduced. The second is that the price of the car is reduced when the price of the plane is reduced.

Working Women Want Chance

Too Many "High-Brows" in British Parliament, Opinion of Women Socialists

Many women in the Socialist and labor movements in England, have reached the conclusion that too many "high-brows" are representing them in Parliament. They point out that the high-brows are not interested in the needs of the working class, and that they are not interested in the needs of the working class. They point out that the high-brows are not interested in the needs of the working class, and that they are not interested in the needs of the working class.

Over Sixty Years Old and Still Agile and Alert

Alberta Lady Very Enthusiastic About Dodd's Kidney Pills

Mrs. M. Griffin, Completely Relieved After Effects of Influenza

and Rheumatism, Alberta (Special)

The following remarkable story is told by Mrs. M. Griffin, a well-known and highly respected resident of this place. She writes to the Fall of 1915 I was sick till January, 1916, when I felt better. I had a very bad cold, and I was very weak. I was very weak, and I was very weak. I was very weak, and I was very weak.

Money Production in Alberta

Money production in Alberta is increasing. The 1920 output being fifty per cent greater than the year before. \$24,000 in value, as compared with \$12,000. One man in the Lethbridge district produced nearly 50 tons, another 16 tons.

When a mother deserts from the writings and fretting of a child that parents are troubling it, she can get a remedy. A reliable remedy. A reliable remedy. A reliable remedy. A reliable remedy.

The city council of the city of India has decided to build a new bridge. The city council of the city of India has decided to build a new bridge. The city council of the city of India has decided to build a new bridge.

Every woman's desire is to achieve that smart, elegant appearance which is the result of a well-fitting dress. The dress illustrated in our new Fashion Book is one of the best of the season. The dress illustrated in our new Fashion Book is one of the best of the season.

### Rural Sanitation

(By C. W. Peterson)

The "new" sanitary districts that have been set up in the rural areas of the province are the well known and the planter. The country committees are also the leading sanitary officers of the U.S.A. In a recent statement on rural health the U.S. government has stated that the country committees are also the leading sanitary officers of the U.S.A. In a recent statement on rural health the U.S. government has stated that the country committees are also the leading sanitary officers of the U.S.A.

### Canadian National Lecture Car

Good Results Achieved by C.N.R. in Spreading Useful Information to Farming Communities

Encouraging results are being achieved by the lecture car which the Canadian National Railway, in conjunction with the Extension Service of the University of Saskatchewan, are operating in Saskatchewan, according to a report received from Mr. J. H. Brown, western manager of the agriculture department of the company. The car, which started on its tour on January 15, had been visited by 175 people up to February 12, in spite of the fact that several points excepted could not be reached because of weather conditions. Of the total audience 507 were children of school age, an interesting fact, as the majority of the tour took active part in the discussion which followed the various lectures.

General topics, village operations, soil cultivation, summer fallow, crop rotation, the importance of good seed, and other subjects, were discussed. The value of insect farming, the importance of the farmer's knowledge of the value of the soil, and the importance of the farmer's knowledge of the value of the soil, were discussed. The value of insect farming, the importance of the farmer's knowledge of the value of the soil, and the importance of the farmer's knowledge of the value of the soil, were discussed.

## GRADUATION AT SCHOOL OF AGRICULTURE

On Friday evening last the Clareholm School of Agriculture was the scene of thousand term-end celebrations in honor of the graduating classes. The following second year students successfully passed the recent examinations and were awarded diplomas by the Provincial Department of Agriculture:

Diplomas in Home Economics: Leona J. Fortney, Dalmeid, Marcel Little, Nanton, Louise M. Muhlly, Granum; Eleanor G. Rushfeldt, Vulcan; Lamma Strandberg, Enchant; Katherine M. McTigue, Nanton; Louise Van Assel, Raymond.

Diplomas in Agriculture: Wm. M. Conley, Ardara; Arthur D. Cutforth-Barons, Fred R. Davies, Brecon, Wales; Robt. W. Hammond, Vangard, Sas.; Leslie M. Hansen, Arina; Leroy P. V. Johnson, Stavelly; Seth J. Larsen, Strling; Geo. S. Newton, Fishburn; Chas. A. Northing, Lake MacGregor; Arthur D. Paul, Lomond; Francis Peterson, Barnswell; Albert H. Rasmussen, Calgary; Joe Squisio, Pagan Reserve, Brocket.

The presentation of diplomas was made by Miss McMillan, and the president of the graduating boys presented a bouquet of roses to each of the graduating girls. An exciting time for all classes followed during which the prizes for proficiency in all branches of school work were presented. Leroy Johnson of Stavelly carried off the silver medal for general proficiency in the senior classes. First prizes for general proficiency in first year work went to Ida Swenson, Orton, and Milton Conrad, Talber, in the departments of Home Economics and Agriculture respectively. The P. Burns scholarships of \$50 to first year students, to be paid to the winners upon their registration in the second year, were awarded to Ida Swenson, Orton, and Wm. Elton, Cooley.

The closing dance followed the evening's program. The floor was more crowded than at any former time in the history of the school. Singing was served to over 400. The Blackbird orchestra furnished the dance music.

## CLASSIFIED ADS

### SEWING

Sewing done at reasonable prices. Mrs. Porter, Clareholm.

### FOR SALE

S. C. White Leghorn eggs from utility stock. 50 cents a dozen. Mrs. G. Mulchow, Stavelly.

## Banff to Waterton Motor Bus Line Starts in June

Macled, March 26.—The secretary of the Board of Trade, Macled, received a communication today from the Brewster Transport Company, Banff, stating that commencing June 8th they will run on alternate days, an up to date auto bus service between Banff, Calgary and Waterton National Park, south one day and north the next. This service will be a great boon to tourists, as it will connect at Banff with five or six other tours which the Brewster Company has organized all through the mountains.

Immigration to Canada for the eleven months of the calendar 1926 ended November 30, amounted to 130,000 persons, according to a recent statement issued by the Department of Immigration and Colonization. This is an increase of 61 per cent over the same period of 1925, when the total immigration was 80,000.

The Maori Rugby Football team, who have recently completed a successful tour of France and Great Britain, moved through Montreal recently en route over the Canadian Pacific lines to Vancouver, where they sailed for New Zealand January 27. This team won, during their eight-month tour, 22 of 31 games played.
